Touch panel driver for Mac OS X
2016   Ver. 1.4.2.0
_____
 [Software name]   Touch panel driver

 [System requirements]
    Mac OS X 10.10/ Mac OS X 10.11

      ※This software is not available in the Classic Environment.

 [Introduction of software]
  This software is designed to be connected with the SHARP touch display and
make its touch panel available.

 [Requirement of use]
  This touch panel driver is only for following SHARP touch displays. It does
not work properly if it is connected to other touch displays.

SHARP   PN-L802B/PN-L702B/PN-L602B

 [Restrictions]
-When you use several displays connecting with the Mac computer simultaneously,
  you can use within 2 displays including the SHARP touch display. Also please
  do not display the menu bar on the touch panel display.
- "Ink" in the System Preferences is not available on this touch panel driver.
- When you use this driver connecting with PN-L802B, sometimes the advanced
  calibration setting does not work properly after restarting the Mac computer.
  In this case, please stop the advanced calibration setting and try it again
  after inserting and removing a USB cable from the display.
